

WORKSHOP ON BIM

In this seminar, we cover the topic of using Building information modeling in construction in detail. The matter is presented in well formatted and structured power point presentations that make use of extensive graphics and videos to enhance comprehension and to make the presentation enjoyable.

The workshop also makes the attendees aware of the training, certification and internship opportunities in MULTICADD design studio.

The topics covered in the presentation include

- What is BIM?
- BIM Processes
- BIM Applications
- BIM Advantages
- BIM Workflow
- BIM & Project management
- BIM & Design team members
- BIM around the globe

Continued learning opportunities for participants include

- Autodesk certification options in BIM which include
 - o Autodesk approved course content and practice exercises
 - o State of the art BIM labs to practice
 - o On campus learning opportunities
 - o Full scale internship opportunity at MULTICADD design studios
 - ☒ Experience certifications
 - ☒ Placement assistances
